Description	An externally threaded fastener with a dome-shaped head and an integrally formed washer, a square socket recess, a shank with a reduced diameter and a single lead thread.					
Applications / Advantages	The deeper thread design offers greater resistance to pull-out forces. The head offers a greater bearing surface than a countersunk design. Used to attach surface-mounted door hinges or master lock hasps into dense woods or when attaching two pieces of wood through a pocket hole.					
Material	C1022 case-hardened steel					
Surface Hardness	Rockwell C 45 minimim FASTENERS 5
