

Serving the Automotive Industry

RC Fasteners & Components is a proud partner and authorized distributor for Rotor Clip International.

For over fifty years, Rotor Clip has supported the automotive industry with our full line of retaining rings, spiral rings, wave springs, and self-compensating hose clamps. As automotive design engineers work to innovate and streamline their industry, our own team of dedicated engineers work in concert with them to develop the most cost-effective and functional components for their applications. From the mirrors to the brakes, Rotor Clip's commitment to quality keeps the automotive industry safe and rolling along.

HO ring retains the valve of this fuel rail assembly.

VSH ring used on an automotive air conditioning compressor.

KL spiral ring on a transmission cooling valve.

Beveled VHO ring in an automotive power steering assembly.
